Re: Rowley Magnesium Plant
NL Industries
Tooele County, Utah
ACT/045/008

Dear Walter:

The Division has received NL Industries M-10 Commitment and map of facilities. We appreciate your prompt reply.

The map of the Magnesium facilities shows the surface land ownership and general area quite well. The Division would appreciate it if maps could be provided which show the plant facilities, dikes, pump stations, pipe lines, and roads in more detail.

The commitment to Rule M-10 by NL Industries is very much appreciated. The variances to Rule M-10(5) and (14) cannot be approved, but in a case where no highwalls or soils exist, no variances are needed. In the case of the revegetation, Rule M-10(12), the variance could be granted. The Division would like to request that the locations where reseeding will be done be shown on a map or listed by township and range and section, so we could have a better idea as to what would grow in that area and whether your seed mixture was adequate.

If you have any questions, please do not hesitate to contact this Division.

Sincerely,

Thomas J. Suchoski
